Abstract

It is of great significance to promote a clean education in the construction of the "big ideological and political course". Clean education and the "big ideological and political course" have equivalent significance in the historical, theoretical, and practical aspects of education in colleges and universities. They represent important components and strategies for education. In order to integrate clean education into the development of "big ideological and political courses" in colleges and universities, it is essential to begin by integrating it into the "big classroom" of schools and promoting reform and innovation. It is necessary to establish a "big platform" for educating people and focus on enlightening education. This involves building a strong team of school "teachers" who uphold the original mission. To construct the "big pattern" of education, it is important to bring together the four aspects of education and achieve the organic integration of clean education and the development of "big ideological and political courses".

Keywords

Clean education, Colleges and universities, Ideological and political courses, Effective path

1. Introduction

In February 2022, the General Office of the CPC Central Committee issued the Opinions on Strengthening the Construction of a Clean Culture in the New Era, requiring all regions and departments to conscientiously implement it in light of actual conditions (General Office of the CPC Central Committee, 2022). On the other hand, it is conducive to creating an education highland with clean cadres and clean teachers, and it is conducive to cultivating high-quality builders and successors of socialist modernization.

2. Clean education and the construction of "big ideological and political courses" have the value of isomorphism

"Gradually form the professional concept of honesty and self-discipline, love one's job and dedication". This is the "Opinions on Comprehensively Carrying Out Clean Education in Universities and Primary and Secondary Schools" issued and implemented by the Ministry of Education. Its purpose is to strengthen the clean culture education of young students so that young students can hold the bottom line in the complicated society, and grow into a successor with integrity and talent.

The rich educational elements in clean education are an important part of the construction of "big ideological and political nutrition". "Honesty in teaching, education, and auxiliary books" is a course that not only focuses on construction but also "Great ideological and political course" has the value isomorphism of historical significance, and significance.

2.1 Historical implication: the goal of educating people is always the same

From a historical perspective of background, system, and practice, we grasp the gradual integration of clean education into the "Big Ideological and Political Course", which will help us fully and deeply understand the great historical and practical significance of clean education and comprehensively promote the construction of "Big Ideological and Political Course". From a historical background, since the founding of the People's Republic of China, the establishment of ideological and theoretical education courses in colleges and universities has provided the possibility for college students' clean education; After the resumption of the national college entrance examination in September 1977, colleges and universities promoted the clean education of college students through the study of Marxist works, civic moral education and other ideological and moral courses (Ideological and Theoretical Education Courses). From the perspective of institutional literature, in January 2005, the Central Committee of the Communist Party of China issued the Implementation Outline of Establishing and Improving a System of Punishing and Preventing Corruption with Equal emphasis on education, system, and supervision, which required colleges and universities to take integrity education as an important part of ideological and moral education for college students, and cultivate correct values and noble moral sentiments; In 2007, the Ministry of Education issued the "Opinions of the Ministry of Education on Comprehensively Carrying Out Integrity Education in Universities and Primary and Secondary Schools", which stipulated that from that year on the whole country's universities and primary and secondary schools to carry out integrity education. From the perspective of clean education practices, the Central Commission for Discipline Inspection and Supervision Department selected 50 clean education bases nationwide for the first time in July 2008 to enrich the forms of clean education in schools. In December 2012, the CPC Central Committee promulgated the 2013-2017 Work Plan for Establishing and Improving a System for Punishing and Preventing Corruption, which specifically pointed out that clean education includes education on socialism with Chinese characteristics and the Chinese Dream, education on ideals, beliefs, and purposes, and education on the system of socialist core values. In the Opinions on Strengthening the Construction of a Clean Culture in the New Era issued by the General Office of the CPC Central Committee in February 2022, it is required to attach importance to the fundamental role of clean education and further promote the construction of a clean culture in the new era. Therefore, from the historical implication of educating people, the CPC Central Committee has always attached great importance to ideological and political education, attaching importance to the clean education of young people, and the goal of cultivating new people with ideals, abilities, and responsibilities has never changed.

2.2 Theoretical implication: the two education functions are highly integrated

All along, China's higher education does not forget the original intention of "moral cultivation, education and power", does not forget the mission of "educating people for the Party and educating talents for the country", and concentrates on cultivating the era of the great rejuvenation of the Chinese nation; Ideological and political education is an important political advantage of the Communist Party of China, and the work of ideological and political education continues to strengthen, improve and innovate in the new era. The practice has proved that ideological and political education plays an irreplaceable role in every stage of the historical development process and in the process of the development of my career. Colleges and universities use clean culture to cultivate party members, cadres, and successors for the country's strong spirit and moist heart, to ensure that the party does not deteriorate, does not change colour, does not change taste; Honesty and integrity are the distinctive political character of the Chinese Communists, and the internal requirements and character of each Communist Party member. Strengthening clean education in colleges and universities can tighten the "master switch" of young students' world outlook, outlook on life and values, guide young students to establish an awareness of anti-corruption and advocate integrity, and promote young students to take up the historical responsibility (Ministry of Education of the People's Republic of China, 2022). From this point of view, clean education and promoting the construction of "Big Ideological and Political Courses" are highly integrated in the function of educating people, and the two have value isomorphism.

2.3 Practical implication: the two educational effects complement each other

Clean education and the construction of "Big Ideological and Political Course" have certain political and ideological characteristics in terms of their essential attributes and practical orientation, and cannot be separated from practice teaching. In the concrete construction of "Big Ideological and Political Course", teachers often integrate positive honesty stories,

warning cases of corruption and clean society to practice with ideological and political course education, which is shown as an "education process, you have me, I have you". In cultivating high-level talents with both morality and talent and sound personality, we should do a good job of "same" and "pass", and effectively promote the synergistic integration of teaching resources.

2.3.1 "Big ideological and political lessons" and clean education should be "the same"

On the one hand, it is necessary to complete and build a strong team of full-time ideological and political teachers and counselors in colleges and universities, and study and grasp the subject connotation, construction law and construction path of "Big Ideological and Political Course"; On the other hand, we should actively hire party and government leaders, advanced models, outstanding alumni and field representatives as part-time teachers of ideological and political courses; At the same time, actively promote the innovation and reform of "curriculum ideology and politics" in colleges and universities, guide the majority of full-time and part-time teachers to integrate value guidance into education, so that young students can get co-education in the space and time field of multi-dimensional and three-dimensional virtual and real combination.

2.3.2 "Big ideological and political courses" and clean education should be "integrated"

On the one hand, we should integrate fresh ideological and political education elements inside and outside the classroom, inside and outside the campus, online and offline, and infiltrate multiple elements of knowledge, emotion, intention, and action into teaching; On the other hand, it is necessary to construct ideological and political lessons that run through the whole school section, through the whole time and space of the school and society, give full play to the integrated, embedded and infiltrating through education effect, excavate, sort out and open all kinds of education resources and forces, and establish a targeted long-term education mechanism, which comprehensively improves the pertinence and effectiveness of education.

3. An effective way to integrate clean education into the construction of "big ideological and political courses"

Comprehensively promoting the construction of "Big Ideological and Political Courses" is the key to the implementation of the fundamental task of cultivating morality and cultivating people in colleges and universities, and it is necessary to consciously undertake the mission and task of clean education. Only in the construction of "Big Ideological and Political Courses", schools should adhere to the combination of integrity and coherence, the parallel of thematic and normal, and the unity of formation and dissemination.

3.1 Integrate into the "big classroom" and promote reform and innovation

Guided by the socialist core value system, we insist on carrying out clean education in colleges and universities with legal education, clean education, social ethics, professional ethics, family virtues, and laws and regulations as the main contents. We must reform and innovate the ideological and political curriculum in the new era according to the law of ideological and political work, the law of teaching and educating people, and the law of students' physical and mental development.

3.1.1 To integrate into the "big classroom", we must learn to understand the Marxist thought of a clean government

We must examine the necessity and urgency of strengthening clean education among young college students, and we must explain the Marxist political view of honesty and integrity thoroughly because the Marxist political view of honesty and integrity is the theoretical source and ideological foundation of the construction of socialism with Chinese characteristics. In the new era, it is essential to impart the Marxist concept of clean government to young college students, guiding them to embrace the principles of integrity and honesty in their lives, and subsequently manifesting these values in their actions.

3.1.2 Integrating into the "big classroom", we must strengthen the study of the President of the People's Republic of China's Party style and clean government construction thought

It is necessary to establish and improve the relevant curriculum system, especially to integrate the specific measures, fresh cases, and practical significance of "anti-corruption and advocating honesty" in the new era in the compulsory ideological and political courses such as "Introduction to the President of the People's Republic of China Thought on Socialism with Chinese Characteristics in the New Era", "Ideological and Moral Cultivation and Legal Basis" and

"Situation and Policy", and set up a special module of integrity education in the curriculum; At the same time, we can also set up electives of clean government education for students to choose, to achieve complementary advantages and dynamic balance to carry out clean government education.

3.1.3 To integrate into the "big classroom", we must strengthen the study of the fine tradition of the Communist Party of China

The century-long struggle history of the Communist Party of China is an important teaching content of our "Great Ideological and Political Course". Wu Xiangdong, a member of the National Committee of the Chinese People's Political Consultative Conference, Secretary of the Communist Party of China History Exhibition Center and Director: "The history of the Party is the most vivid and persuasive textbook" (Wu Xiangdong, 2023). We should use this "main channel" to enrich the "clean" content of the Party history in the silent mind, and effectively play the role of educating people in the Party history.

3.1.4 To integrate into the "big classroom", we need to change the concept of innovative education

Under the nature, direction and goal of running a socialist university with Chinese characteristics, and the responsibility of training builders and successors in the new era, we must adhere to the combination of theoretical education and practical education, and the combination of history and reality. Explore and promote new teaching models such as inquiry, interactive, and issue teaching in clean education, and use positive and negative vivid cases to carry out teaching activities, so as to enhance the attractiveness and persuasion of clean education.

3.2 Build a "big platform" and focus on enlightening education

Ideological and political theory courses have the characteristics of strong theory and difficult to understand, so it is particularly important to strengthen inspirational education inside and outside the classroom. In particular, clean education needs to be detailed in the key points of ideological enlightenment, the study of regulations and documents and social practice.

3.2.1 Build a "big platform" and make good use of practice teaching bases such as a clean education base and red education base

In 2022, the Ministry of Education and relevant departments will jointly announce the first batch of 453 practical teaching bases of "Big Ideological and Political Courses", which will include seven topics, including excellent traditional Chinese culture, revolutionary culture, and advanced socialist culture, which will be an important supplement to traditional educational resources on campus. Various teaching methods, such as experiential, situational, and immersive methods, will be used to enable young students to experience and understand themselves. To highlight the truth charm and practical power of the Party's innovative theories (China Youth Network, 2022).

3.2.2 To build a "big platform", we must dig deep into the clean ideological and political elements of the curriculum

The degree and level of exploring the honest ideological and political elements in all kinds of courses is the key point of the reform and innovation of curriculum ideological and political teaching methods, and it is also the test standard of the effect of curriculum ideological and political teaching. It is necessary to grasp the comprehensive function of ideological and political pluralism in the curriculum, seize the needs of The Times and reality, and correctly, fully, and clearly put the invisible elements of ideological and political integrity in the curriculum to achieve the teaching purpose of the implementation of imparts, ability training and value shaping of young college students.

3.2.3 To build a "big platform", there must be a co-construction and sharing, comprehensive and systematic clean teaching and research system

It is necessary to adhere to the use of "digital" to empower clean education, such as creating several clean education ideological and political "golden courses", and developing high-quality and multi-form clean education teaching cases, developing high-level online clean education demonstration courses, etc., flexibly using "digital" to promote high-quality clean ideological and political education, and encourage young college students to honor and maintain integrity in independent learning.

3.3 Build up "big teachers" to carry out the original mission

"Since the 18th National Congress of the CPC, the CPC Central Committee and The State Council have insisted on the construction of teachers as the basic work" (Department of Teachers' Work, Ministry of Education, 2022). All regions are deeply promoting the construction of high-quality, professional and innovative teachers, and great changes have taken

place in the overall appearance of the teaching team. Practicing the original mission of "great teacher" in the new era is an important sign of the high-quality development of education in China, and also an interpretation of the strong strength of educating people in our country.

3.3.1 To strengthen "big teachers", we must adhere to the participation of all staff

First of all, it is necessary to give full play to the "head-goose effect" of leading cadres in the school and add certain content of integrity education in the opening ceremony, military training for freshmen, graduation ceremony, and important festival celebrations, to guide students to establish correct values and noble moral sentiments. Secondly, we should promote the ideological and political courses of ideological and political teachers and professional teachers, promote the combination of small ideological and political classes and social classes, guide students to firmly "four self-confidence", and establish a sense of integrity and rules. Moreover, it is to give full play to the role of front-line ideological and political counselors in educating people, timely integrate clean education into the daily management and service work of students, and make good use of the advantages of this team familiar with the law of student growth and personality characteristics.

3.3.2 To build up "big teachers", we must constantly improve the comprehensive quality of teachers themselves

"The key to running ideological and political theory courses well lies in teachers, and the key lies in giving full play to teachers' enthusiasm, initiative and creativity" (State Leader, 2019). This is a clear requirement for the construction of ideological and political teachers. To carry out clean education, high-quality teachers with strong politics, deep feelings, new thinking, broad vision, strict self-discipline and positive personality are key. Because the teacher's words and deeds affect the students' cognition and behavior imperceptibly, so the teacher should be modestly educated first, to educate people with heart, to use the force of personality to become a decent person, to use the power of truth to inspire people, only with such a team of teachers, "big ideological and political course" can cultivate new people who can be a great responsibility of The Times.

3.3.3 To build up "big teachers", we should give full play to the team of part-time teachers

When integrity education is integrated into the construction of "big ideological and political courses", it is also necessary to have a team of part-time teachers with excellent quality, who play an irreplaceable role in extracurricular and off-campus practical courses. For example, the outstanding alumni, model workers, artisans of great countries, heroes of the anti-epidemic epidemic and interpreters of the Red Base are all important teachers for us to comprehensively promote the construction of the "Big Ideological and Political Course", because we want to use fresh ideological and political materials to open the classroom vision, make the ideological and political course become a good course that students truly love and benefit from for life, and guide students to be neutral and ambitious in the unity of knowledge and action.

3.4 To build a "big pattern" and bring together concerted efforts to educate students

The reason why the "Big Ideological and Political Course" is big is that where the students are, the ideological and political course is there. This is the objective requirement of the construction of the "Big Ideological and Political Course", which requires a scientific guarantee mechanism, a new education and teaching means, and an education model that adapts to The Times.

3.4.1 The construction of the "big pattern" needs a scientific guarantee mechanism

Clean education resources in and out of class, in and out of school, online and offline, continuously enrich school ideological and political education, not only can enhance the vitality, attractiveness, and affinity of the construction of "Big Ideological and Political Course", but more importantly, can ensure that "Big Ideological and Political Course" does not deviate from the fundamental task of cultivating morality and people. This requires the construction of "Big Ideological and Political Courses" to be escorted by a scientific guarantee mechanism, that is, the state should gradually form a diversified and coordinated education environment, the school should be coordinated and orderly under the unified leadership of the Party committee, and further promote the integration of ideological and political courses in universities and primary and secondary schools, and take root and sprout under the support and trust of all sectors of society.

3.4.2 To build the "big pattern", we need to strengthen media literacy

The media concept of "whole-process, holographic, whole-staff, whole-school" was proposed by national leaders (State Leader, 2019). First of all, the "four-in-one" media concept provides us with the integration direction of integrating integrity education into the "Big Ideological and Political Course". Media education is related to the key field of national ideology and is one of the important means to carry out integrity education. We should make good use of it. Secondly, we should continuously strengthen the construction of the campus media team, take moral cultivation as the center of

work, integrate the elements of integrity education such as firm ideals and beliefs, deepen patriotic feelings, and strengthen moral cultivation into the new era of media, guide the media to shoulder the responsibility of cultivating the successors of national rejuvenation, and let the integrity education imperceptibly integrate into the ideological and political education of students.

3.4.3 To build a "grand pattern", we need to innovate the education model

While grasping the role of ideological and political courses as the main channel of education, we should dig deep into the elements of clean education in the second and third classrooms inside and outside the school. First of all, in the rich and diverse social practices, social activities, and various kinds of student association activities on campus, according to the internal needs of students' own development, we should increase the honesty teaching units, teaching modules, and teaching projects, and constantly expand and improve the teaching and teaching level of clean education and the quality of talent training. Secondly, it is necessary to adhere to the "Internet+ clean education", build a full coverage of the "smart campus", constantly improve the network's new media matrix, make good use of the school's digital information platform, give play to the "three micro, one end, and one network" network education pattern, promote clean education to enhance the contemporary and attractive and realize the "big ideological and political courses" everywhere.
